PATENT P57022

## IN THE CLAIMS

Please cancel claims 12 through 22 without prejudice or disclaimer of their subject matter.

- 1. (Original) A plasma display panel, comprising:
- 2 a first substrate;
- a second substrate opposing the first substrate with a predetermined gap therebetween;
- 4 and

1

- barrier ribs arranged between the first substrate and the second substrate to define a
- 6 plurality of discharge cells;
- wherein at least one row of every three rows of the discharge cells is arranged in an open
- s configuration to form open discharge cells, and the other rows of the discharge cells excluding
- the at least one row include discharge cells are arranged in a closed configuration to form closed.
- 10 discharge cells.
- 2. (Original) The plasma display panel of claim 1, wherein first, second, and third
  - phosphor films are arranged in the discharge cells; the first phosphor film being arranged in the
- open discharge cells; and the second and third phosphor films being arranged in the closed
- 4 discharge cells.

PATENT P57022

- 3. (Original) The plasma display panel of claim 2, wherein first, second, and third phosphor films respectively comprise red, green, and blue phosphor films.
  - 4. (Original) The plasma display panel of claim 1, wherein the open discharge cells and the closed discharge cells are arranged in a repeated predetermined pattern.
  - 5. (Original) The plasma display panel of claim 1, wherein the open discharge cells are arranged in a stripe pattern and the closed discharge cells are arranged into quadrilateral shapes.
    - 6. (Original) The plasma display panel of claim 5, wherein the closed discharge cells are defined by first barrier ribs arranged in a lattice configuration, and the open discharge cells are defined by spaces formed by the first barrier ribs.
    - 7. (Original) The plasma display panel of claim 5, wherein the closed discharge cells are defined by first barrier ribs arranged in a lattice configuration, and the open discharge cells are defined by spaces formed by the first barrier ribs and by second barrier ribs arranged in the spaces.
  - 8. (Original) The plasma display panel of claim 6, wherein one cell unit comprises two rows of closed discharge cells and one row of open discharge cells, and wherein the cell units are arranged repeatedly.

PATENT P57022

- 9. (Original) The plasma display panel of claim 7, wherein one cell unit includes one row of closed discharge cells and two rows of open discharge cells, and wherein the cell units are arranged repeatedly.
  - 10. (Original) The plasma display panel of claim 1, wherein first, second, and third phosphor films are arranged in the discharge cells; the first and third phosphor films being arranged in the open discharge cells; and the second phosphor film being arranged in the closed discharge cells.
  - 11. (Original) The plasma display panel of claim 10, wherein first, second, and third phosphor films respectively comprise red, green, and blue phosphor films.

Claims 12-22 (Canceled)
